Medical Ethics in Islam

Abstract

Dealing with the life and mind of human beings, medicine has a high and popular position in every culture. Looking at medicine as a Holy profession since long ago, people have expected those holding this occupation to assume moral virtues and remove vices in order to safeguard the sanctity of this profession and promote their social position. Taking ethics into consideration has a long history in medicine. However, the most efficient and the best moral instructions are found in the precious treasury of Quranic verses and traditions. Knowing medical ethics and morals in the teachings of the Islam, sticking to its conduct, and putting them into practice, plays an efficient role in eliminating flaws, as well as offering better and more efficient services in the field of medical ethics. Surveying the background of ethics in medicine, and referring to ethical clauses in the Hippocratic oath letter, the present article deals with certain issues relevant to medical ethics in Islam.

Keywords: ethics, tradition on medicine, medicine, Islam, healing, remedy
